## ABOUT SEYON

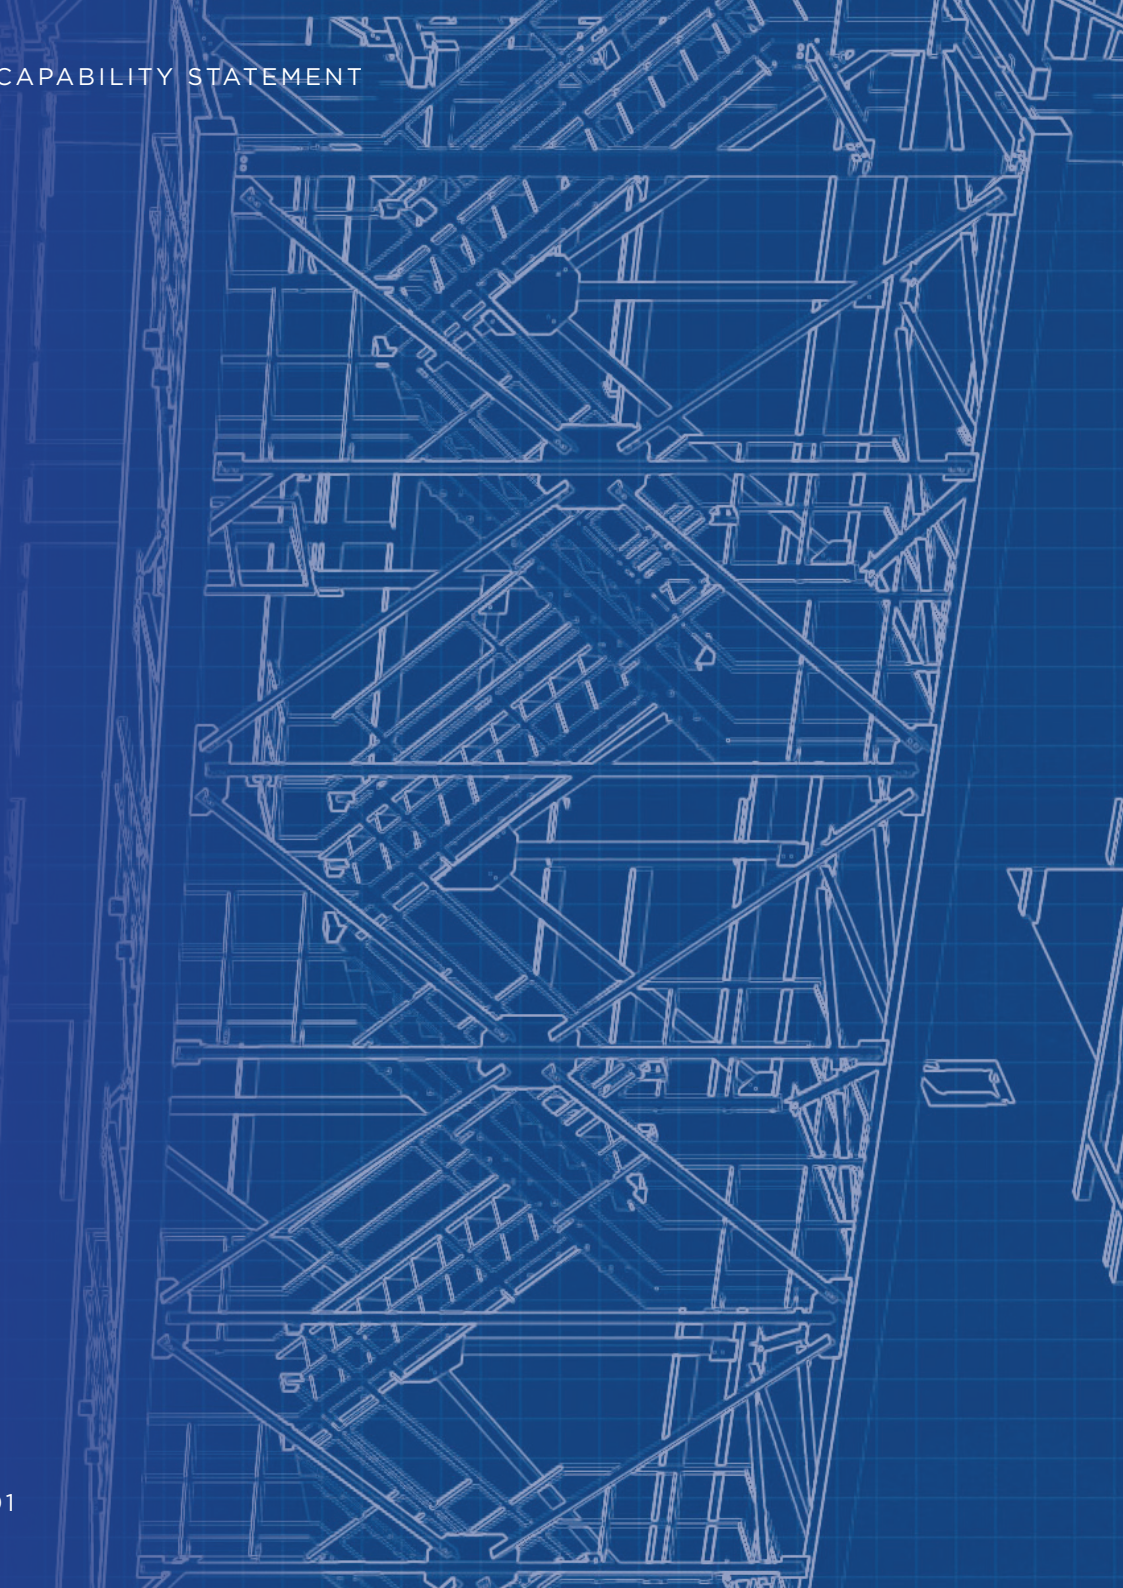

Operating since 2013, Seyon Engineering is a growing organisation with services that complement our clients in all their engineering requirements.

Located in Sydney NSW, Seyon offers clients a complete range of CAD services on a variety of software platforms.

Seyon has been established with an aim to provide quality back-office engineering design and drafting services to its customers across Australia. We assist customers to optimise their project delivery time and enable them to remain competitive in the market.

Seyon has grown both in size and expertise in providing our customers with professional back-office engineering services. We presently have a qualified team of around 40 professional engineers who can customise our services to individual business requirements.

## SECTORS

Seyon works with customers across Australia in the following sectors:

MINERAL PROCESSING

WATER TREATMENT

MATERIAL HANDLING

FOOD PROCESSING

INFRASTRUCTURE

HEAVY MACHINERY

PHARMACEUTICALS

## OUR DIFFERENCE

We don't just draft, we add value.

To be the customer-preferred engineering services provider in Australia, delivering value-added services in line with international quality standards that increase customer productivity and deliver innovative and cost-effective engineering solutions.

## WHAT OUR CUSTOMERS SAY

We have actively used Seyon's services for more than five years. I give them tasks on almost daily basis and find them to be responsive and somehow ever-available. Many other contractors will struggle with juggling different jobs and finding time for yours. This is something that Seyon have nailed.

I see them as the bloke who we couldn't afford to employ on a full time basis in the office, except they handle more work than one engineer.

I have found them to be very trustworthy when it comes to confidentiality and integrity.

Since we've worked with them for so long and they've mostly assigned the same people to do our tasks, and know how to update things that we've done before.

In short, if tomorrow there were no Seyon - I'd be in trouble!

## OUR VALUES

### We exist to

Provide efficient and value-driven engineering design.

### Our values

We do what we say.  
Driven to provide value.  
Always on - always available.  
Ready for what's next.

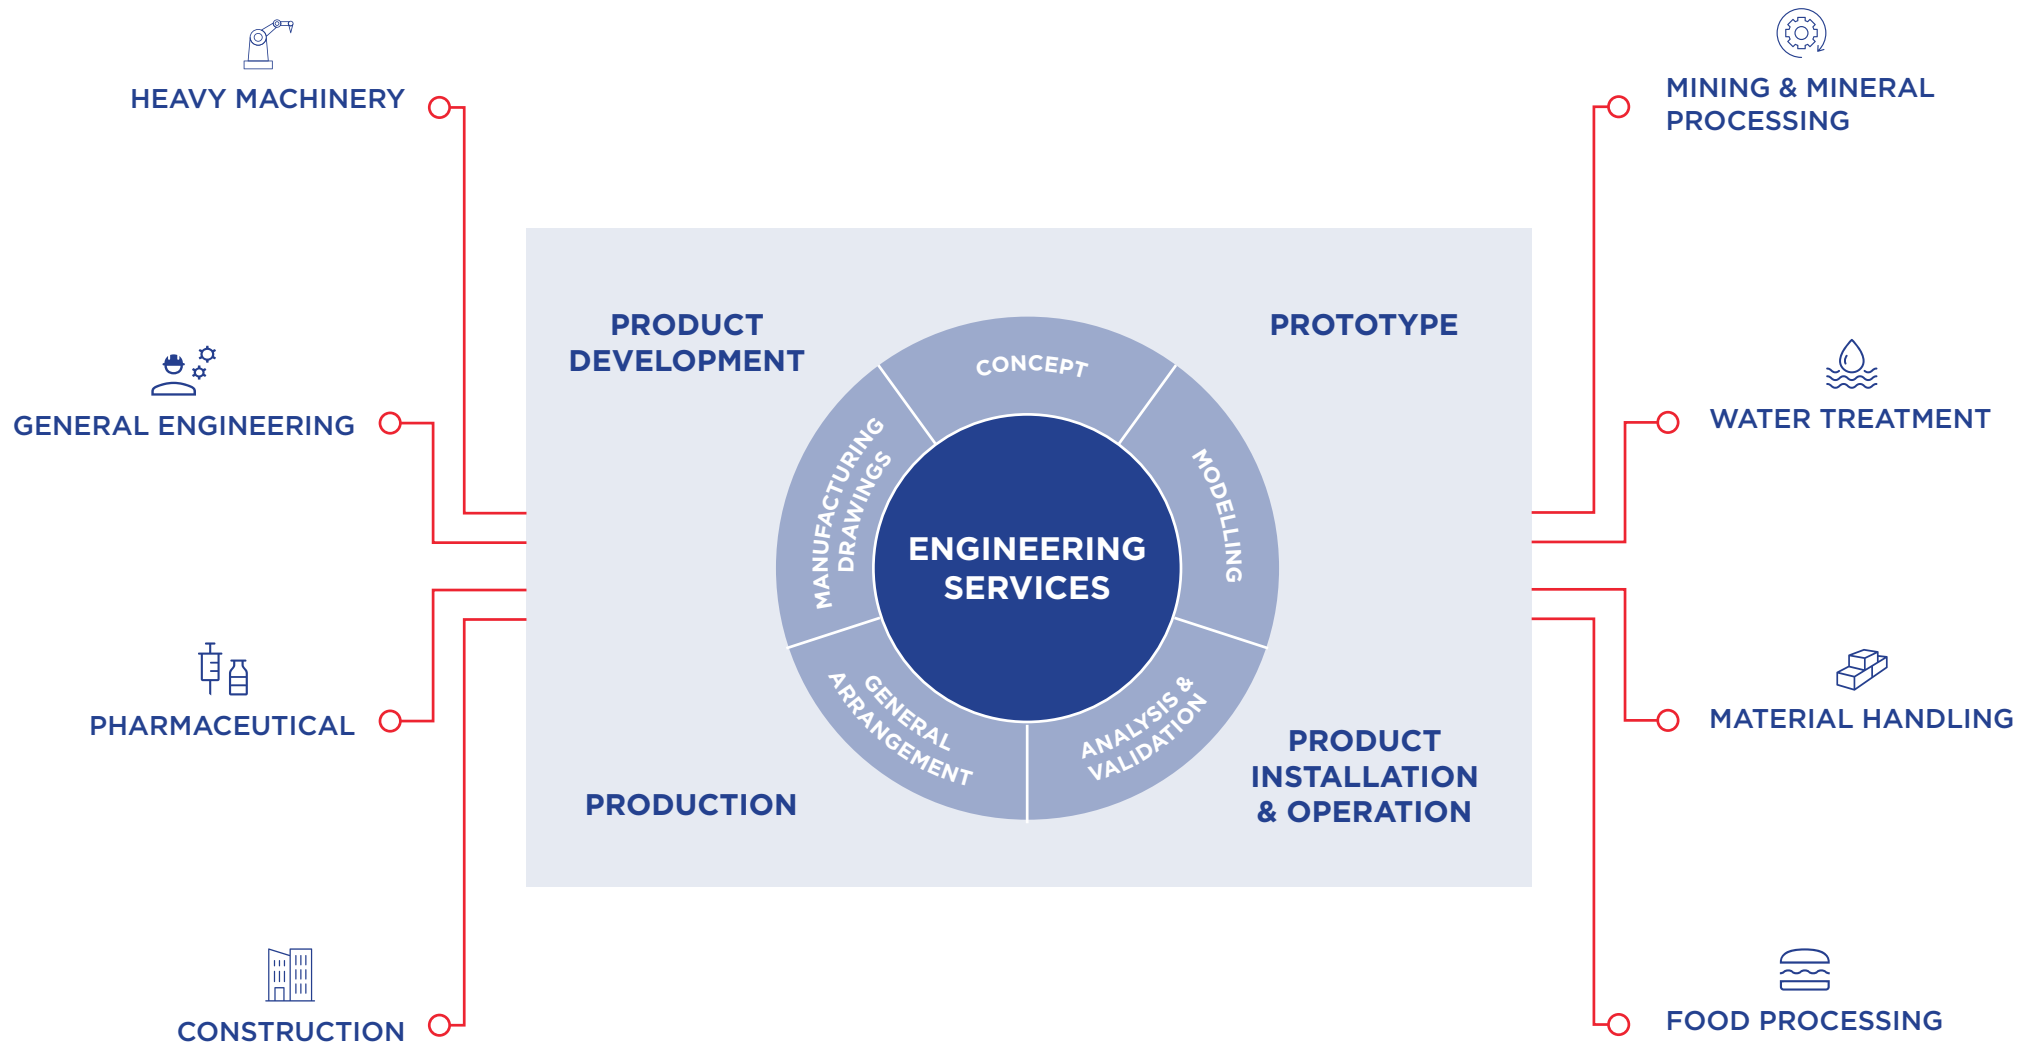

### We are

Growth partners.

### We achieve this by

We plug into your business' engineering team without disruption and deliver cost-effective design by adapting to systems and processes with exceptional customer service to help your operational growth.

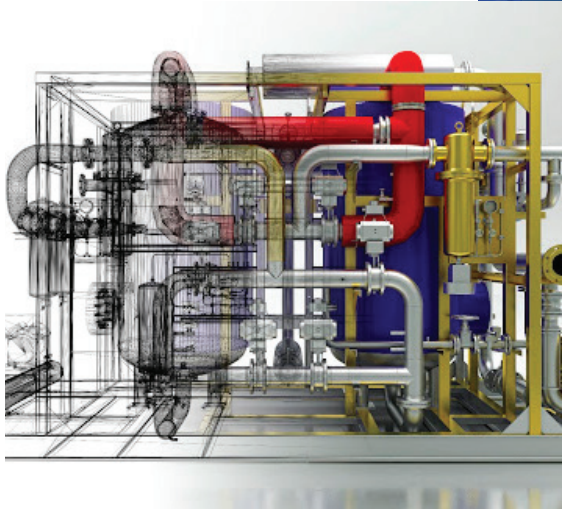

## OUR SERVICES

From concept to design our services range from basic process flow diagrams to modelling large plants and structures.

Our Design services include :

- PFDS, P&IDS, SMART P&IDS
- 3D MODELLING & 2D DRAFTING
- PRODUCT DEVELOPMENT
- SKIDS DESIGN & DETAILING
- PLANT LAYOUTS & ARRANGEMENTS
- PIPING ISOMETRIC DRAWINGS
- AR INTEGRATED ENGINEERING SERVICES
- DESIGN ANALYSIS & VALIDATIONS
- STRUCTURAL MODELLING & DETAILING
- VIRTUAL TOURS OF PLANT SYSTEMS
- 3D SCAN TO MODELLING & ANALYSIS

## TECHNOLOGY

We believe in technology and its power to bring business into the future and make our world a better place. Our client benefits from Seyon's innovative ideas and use of the latest technologies to achieve desired outcomes.

We're future-focused to make sure you're ready for what's next.

## DESIGN TOOLS

- INVENTOR
- SOLIDWORKS
- AUTOCAD PLANT 3D
- REVIT
- TEKLA
- COLLABORATIVE SYSTEMS
  - BIM360
- DOCUMENT MANAGEMENT SYSTEM
  - AUTODESK VAULT
  - SOLIDWORKS PDM
  - SEYON PROPRIETARY WEB-BASED SYSTEM
- 3D RENDERING
- 3D ANIMATION

## OUR FUTURE

Our focus on the future has prepared our capability to integrate Digital or Virtual twin technology into our customer's projects.

A Digital or Virtual Twin not only models existing or new manufacturing processes, it optimises them, highlighting new areas of possibility whilst validating new initiatives saving time and cost.

Technological advancements have become an essential part of the wider Seyon business strategy that enables us to integrate digital and physical assets, facilities and processes.

As a user of this technology, Seyon offers its customers an opportunity to benefit from our research and best practices on integrating Virtual or Digital Twin technology across our engineering design projects.
